

Aristocrat II

Annual Ryegrass

“A new Australian bred Annual Ryegrass which has consistently out yielded all other Annual and short term ryegrasses in grazing trials conducted by the QDPI over a seven years.”

- High winter and early spring production in a wide range of climate.
- High rust resistance.
- High quality for late season hay or silage.
- Higher total season growth than many short term ryegrasses in SE Australian environment.
- Aristocrat II also has significantly higher total herbage yield than the next leading variety in Queensland trials.
- Australian bred.
