

ACHIEVE

Italian Ryegrass

An Australian bred Italian ryegrass taking on the best the rest of the world can offer

- ✓ Bred and grown in Australia
- ✓ Designed for local conditions with a unique breeding of 10% annual and 90% Italian
- ✓ Later heading to maintain quality later into the season
- ✓ Has the winter production of an annual with the later production of an Italian ryegrass
- ✓ Able to grow in areas of low soil fertility due to its increased nutrient utilisation
- ✓ Lodging prevented during hay and silage production as Achieve is a more upright variety
- ✓ Has the ability to go through to the second year if the season is favourable
- ✓ Selected for increased ability to recover from heavy grazing
